Job Title: Energy Engineer

Job Description:

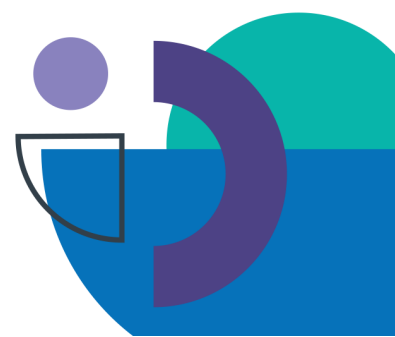

The Energy Engineer will be responsible for delivering projects, providing technical advice and innovative approaches, relating to climate change issues & decarbonisation.

The Energy Engineer will deliver high quality Energy Management and Sustainability advice and consultancy to achieve site and corporate energy reduction, carbon reduction and sustainability targets. A key aspect will be working with CGBC clients that wish to achieve ISO 50001 certification as part of their decarbonisation strategy and have ambitious targets for saving energy and reducing carbon emissions.

This role offers the opportunity to work and liaise with a diverse portfolio of high-profile clients. Services will be carried out remotely and on-site, geographically across Ireland and within all industry types.

1A Hume Centre,
Hume Avenue, Park West,
Dublin 12,
D12 C8C7

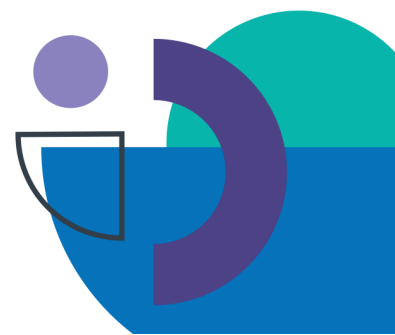

Duties & Responsibilities:

- Engage fully with the client and manage all aspects of the ISO 50001 energy management system to ensure certification.
- Project Management of ISO 50001 consultancy projects.
- Performing energy audits as required by ISO 50001 and SI 426 European Union (energy efficiency) regulations 2014.
- Assist clients with energy planning objectives.
- Delivering best practice solutions to clients in a range of energy related services.
- Experience in energy auditing, energy consumption forecasting, and energy modelling through the life cycle and capital cost/benefits analysis.
- Undertake energy efficiency design reviews.
- Complete measurement and verification.
- Identify client energy training requirements and delivery as required.
- Completion of carbon footprint and reduction strategies.
- Devise and support the implementation of net zero strategies for our clients.
- Keeping abreast and advising on all energy and environmental legal requirements.
- Maintain knowledge of energy/carbon policy developments, energy markets and wider energy/sustainability issues.
- Developing, managing, and maintaining strong working relationships with other clients, and other internal and external stakeholders to support the delivery of high-quality outcomes.

Key Requirements

- Experienced in ISO 50001 Energy Management System Standard.
- Demonstrated experience in managing Energy and Sustainability programmes in industry.
- Motivated with enthusiasm for energy management.
- Target driven for delivery of services.
- Strong communication, interpersonal and presentational skills.
- Excellent planning and organisational skills.
- Excellent computer skills in particular Microsoft Office and Outlook.
- Willing to travel to sites, have own car and hold a Full Irish Driving Licence.
- Experience in energy efficient design of buildings or building services.
- Experience in building fabric and building services retrofit projects.
