Job Title: Energy & Sustainability Analyst

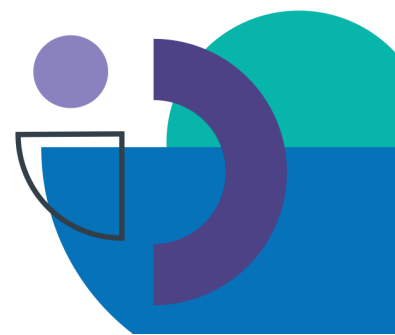

Job Description:

The Energy & Sustainability Analyst will support the delivery of high-quality Energy Management and Sustainability advice and consultancy to achieve site and corporate energy reduction, carbon reduction and sustainability targets. A key aspect will be working with CGBC clients that wish to achieve ISO 50001 certification as part of their decarbonisation strategy and have ambitious targets for saving energy and cutting their carbon emissions.

This role offers the opportunity to work and consult with a diverse portfolio of high-profile clients. Services will be conducted remotely and on-site, geographically across Ireland and within all industry types.

Duties & Responsibilities:

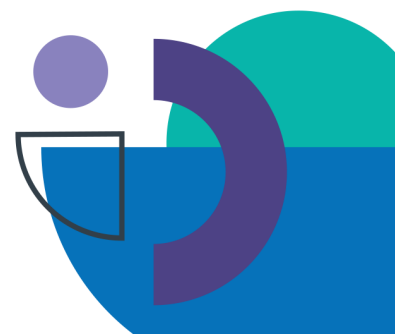

- Engage fully with the client and manage all aspects of the ISO 50001 energy management system to ensure certification.
- Establishment, documentation, and implementation of ISO Energy management systems according to ISO 50001 standards, clauses, and requirements.
- Project Management of ISO 50001 consultancy projects.
- Collecting and validating client sustainability data
- Completion of carbon footprint reporting. Scope 1, 2 & 3.

- Study data to generate insights to derive potential sustainability strategies for the client.
- Devise and support the implementation of net zero strategy for our clients.
- Identify best ways to communicate and disseminate datasets to key stakeholders.
- Delivering best practice solutions to clients in a range of energy and sustainability related services.
- Identify client energy training requirements and deliver training.
- Keeping abreast and advising on all Energy and Environmental Legal requirements.
- Maintain knowledge of energy/carbon policy developments, energy markets and wider energy/sustainability issues.
- Monitor and advise on ESG developments.
- Developing, managing, and maintaining strong working relationships with other clients, and other internal and external stakeholders to support the delivery of high-quality outcomes.
- Develop internal process and reporting tools to streamline deliverables.

Key Requirements

- Experienced in ISO 50001 Energy Management System Standard.
- Demonstrated experience in managing Energy and Sustainability programmes in industry.
- Motivated and have an enthusiasm for sustainability.
- Target driven for delivery of services.
- Strong communication, interpersonal and presentational skills.
- Excellent planning and organisational skills.
- Excellent computer skills in particular Microsoft Office and data visualisation tools.
- Excellent data management approaches with high level attention to detail.
- Willing to travel to sites, have own car and hold a Full Irish Driving License.
- Strong understanding of corporate sustainability concepts, international frameworks, principles, reporting requirements and themes.
- Broad knowledge of environmental legislation, ESG principles and sustainability rating schemes.
