

Simple 'corporate lifestyle' changes you can make to begin the minimisation of Carbon Footprint would include:

SWITCH IT OFF

Switching off lights, printers, and other appliances and changing to LED bulbs will not just reduce carbon footprint, it will also save some euros along the way.

GO PAPERLESS

Do you need to print it? Can you forgo printing and proof-read by scrolling? Can you submit proposals or pitch to a client digitally?

2 IS BETTER THAN 4

Encourage your employees to engage with your Sustainability programme (and improve their health) by availing of the Cycle to Work Scheme.

ZOOM IN

Where possible (and we appreciate that face to face is often a deal winner) organise online meetings to reduce travel.

STORE IS UP

Move to Cloud to reduce storage which doesn't just chew electricity but clogs up your topological arteries.

THE THREE R'S

Reduce, Reuse, Recycle has never been more relevant. Invest in reusable cups and cutlery. Set up a small recycle zone for staff to place all recyclable items.

CG Business Consulting can offer your organisation a suite of Sustainability Services that will help reap tangible business benefits of Sustainability such as:

- Improved productivity
- Appeal to progressive talent
- Enhanced brand reputation
- Minimisation of risk
- Compliance with regulation
